WEST AFRICA LEADING BUILDING, CONSTRUCTION,
AND MACHINERY EVENT HOLDING IN LAGOS, NIGERIA.

Theme:

A BUILDING REFORM SYSTEM THAT WILL
FOSTER GROWTH AND SUSTAINABILITY

The Building, Construction, and Machinery Exhibition (BUILDMACEX) is an international exhibition and conference platform dedicated to transforming the West African building and construction industry. It is organized to drive and support the acceleration of changes in all aspects of architectural design, building, and construction in West Africa through the application of technologies.

BUILDMACEX Nigeria brings together global experts in the Building, Construction and Machinery industry to offer innovative solutions that are tailored to your needs.

The three (3) days event- exhibition, conference, and B2B- is now in its 9th edition, and it will showcase a comprehensive range of technology and innovations as they impact the building and construction industry in West Africa.

THE INDUSTRY AT A GLANCE

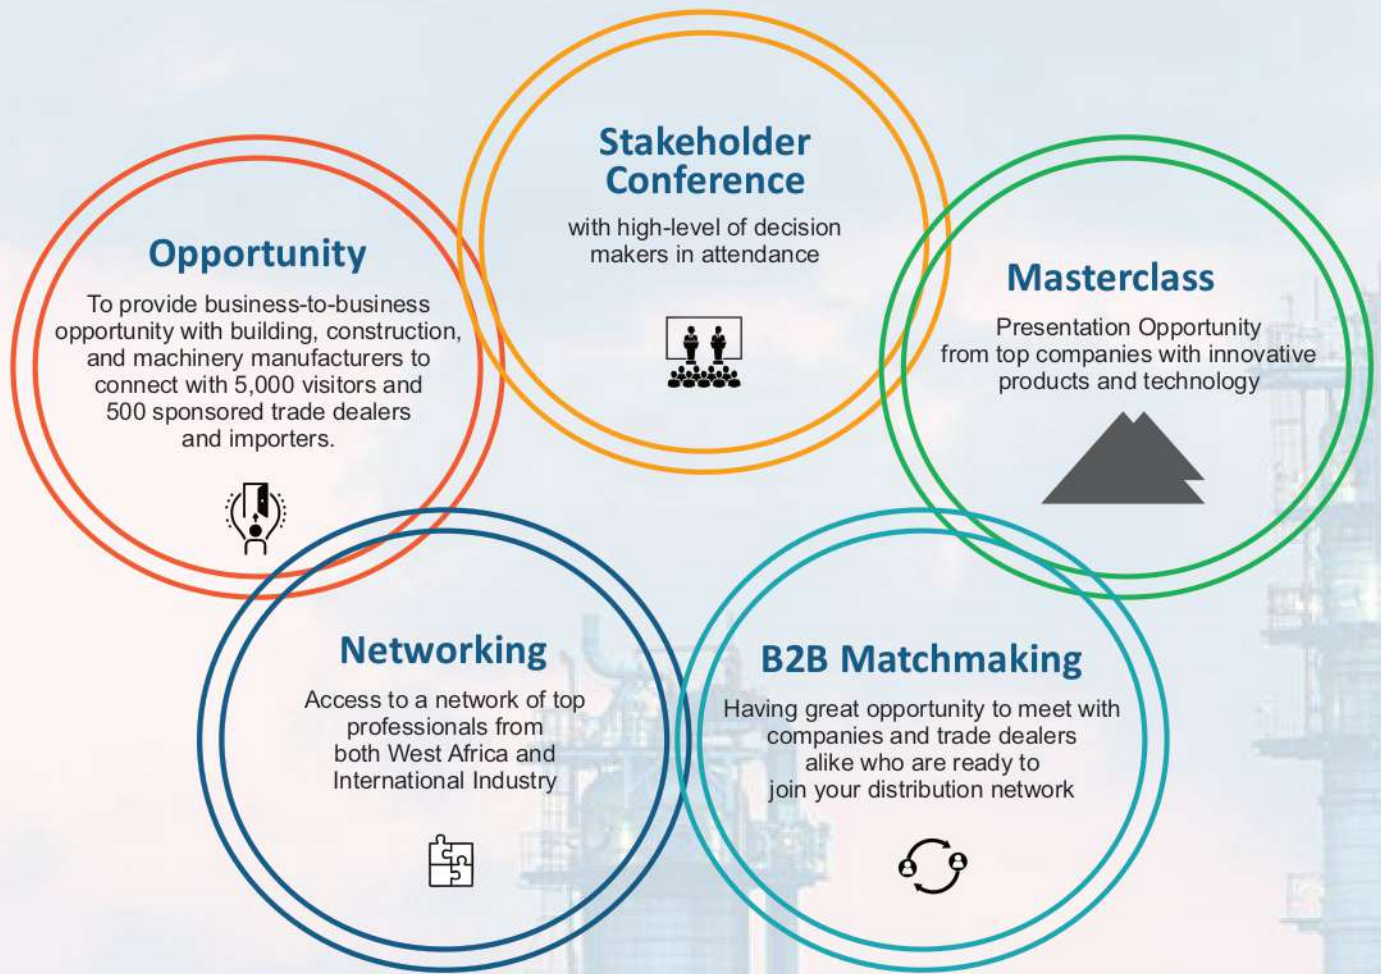

The face of the African construction industry is changing. Construction projects on the continent are getting bigger and more complex. According to recent reports, this is owing to rapid urbanization, strong economic growth, a rising middle class and regional integration in many of Africa's 54 nations. All make for the ever-increasing demand in Africa's construction industry, as big infrastructure projects get under way on the continent.

Nigeria is often highlighted as one of the most attractive markets in Africa for construction works. In West Africa, of the nearly \$120bn committed to infrastructure spending across 92 projects, 61% is earmarked for plans in Nigeria.

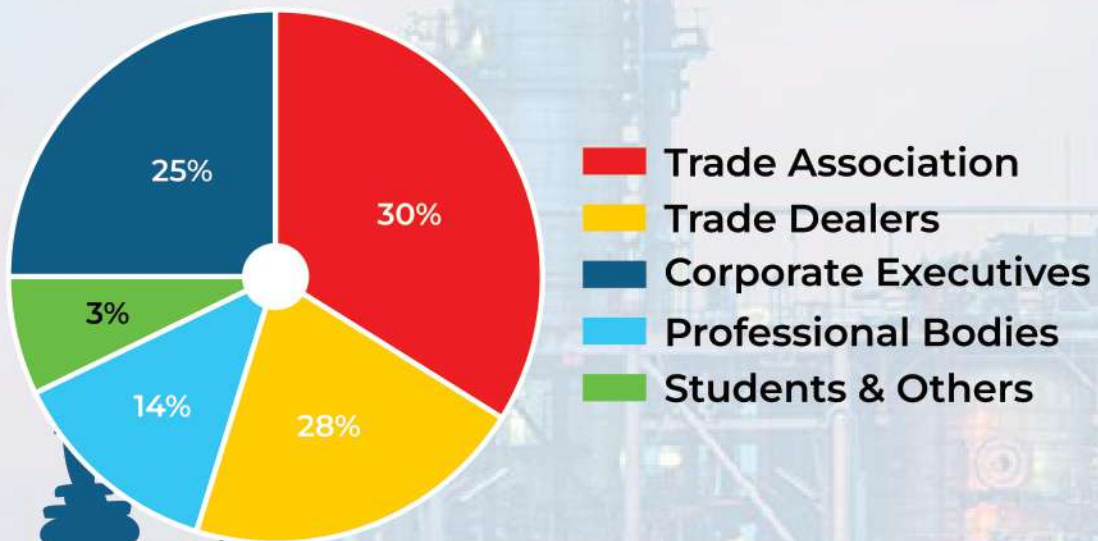

Over the three days, you can expand your network, build your brand, and generate new business that will benefit you for years to come.

- ✓ **Over 200million** in Population
- ✓ **\$54.2 billion** active Projects value in Nigeria
- ✓ **2021-2025** Private Sector commitment on construction \$120 billion
- ✓ **2021-2025** Government commitment on construction \$123.1 billion
