WHY UGANDA

Uganda's electricity demand has been growing at an average of 10% per annum.

97% of Uganda's Exports in Africa are to countries in the EAC and COMESA regions. Uganda has seen an increase of 20% in the total imports in recent years.

Uganda has many renewable energy resources like bioenergy, water / hydro, solar and others that can be used for energy production and the provision of energy services. Many of these resources are yet untapped.

Uganda is the largest growing economy in the East Africa Region.

Existing solar data clearly indicate that the solar energy resource in Uganda is high throughout the year indicating a huge untapped potential in this sector.

There is a steady increase in demand of commodities in the Power & Electricity segment in Uganda which is indicative of the growing market.
